

## CONVY-DCDC-800V-15-RB-00 (DOUBLE CONVERTER)

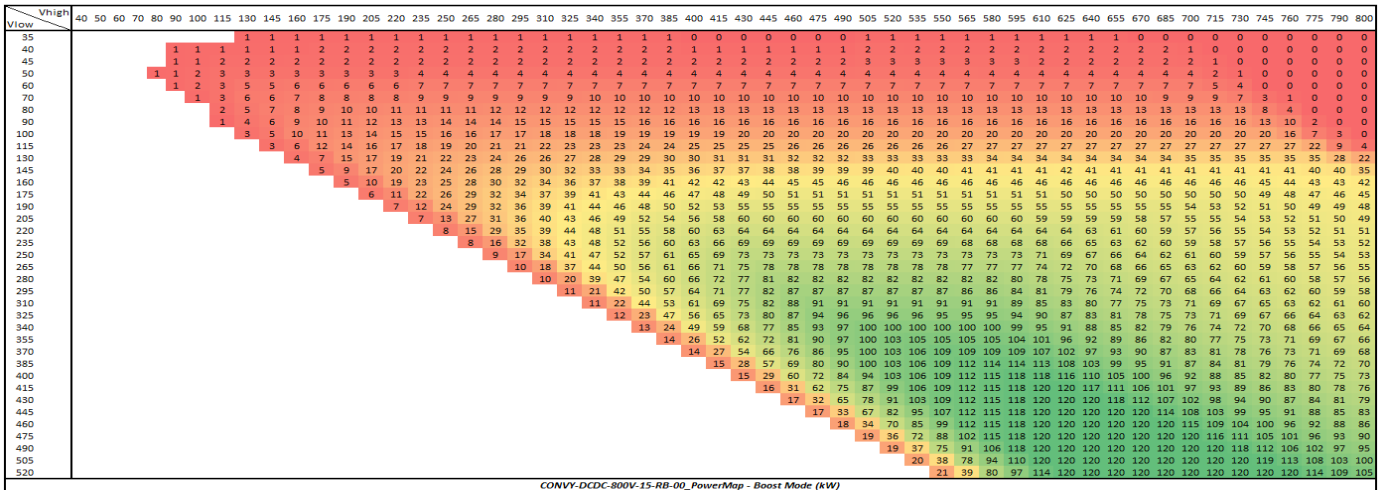

### Maximum output power according to Vlow side and Vhigh side

Map power capability according to low side and high side voltage

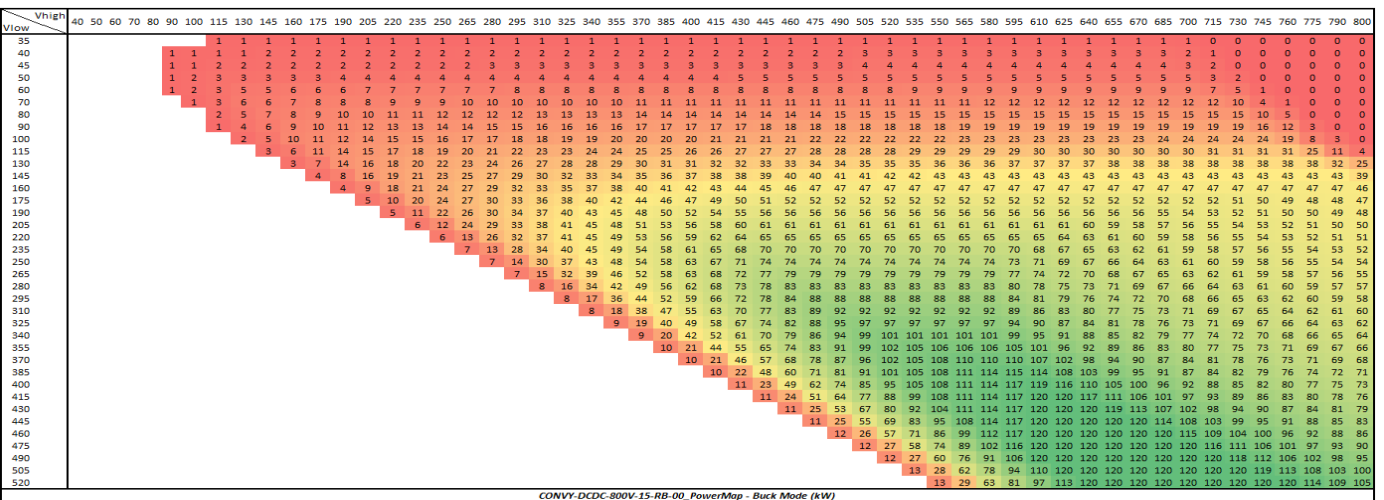

- Tame-Power DC/DC converters embed a powerful software that permanently calculates the maximum power the device can transfer.
- The calculation is done in real-time, according to the values of low side voltage and high side voltage.
- The Power Maps aim to bring you a clear overview of how the features change according to the operating point.
- This allows you to optimize the overall performance of your whole system by selecting the best voltage ranges to operate.

### Boost mode (in kW)

### Buck mode (in kW)

Each product reference has its own Power Map. For any detailed information please contact our sales team:
